

Budapest, May 11th 2018.

Gate One CEO's for future of the ATM environment

The Gate One CEO's met on May 11th in Budapest to discuss high level ATM issues relevant for the Gate One region.

The conference was dedicated to share views and formulate common positions on significant topics such as the new Network Functions Implementing Rule and RP3 preparation, and developments of the Digital Single European Sky concept. Gate One CEOs also expressed their view of the future ATM environment and fundamentals of the new CANSO Strategy. For the next one year term, Gate One chairmanship will be undertaken by Mr Kornél Szepessy, CEO of HungaroControl.

Gate One partners support the more comprehensive position of CANSO and are open to discussion

The members of the GATE One initiative, which is one of the largest regional ANSP platforms in Europe
