HungaroControl

Safety, Quality, Security and Information Security Policy of HungaroControl Pte. Ltd. Co.

HungaroControl Pte. Ltd. Co. provides reliable services to all its customers and promotes the safe, efficient and continuous flow of air traffic.

To this end, it maintains and develops its capabilities necessary for service provision, operates its safety, quality, security and information security management systems in an innovative way, and develops its safety, security and information security culture.

HungaroControl Pte. Ltd. Co.:

1. considers safety as a fundamental requirement and a priority, in compliance with the procedures prescribed in domestic, EU and international regulations, applicable international standards, while taking industry best practices into account;

2. is committed to maintaining and enhancing its resilience as a critical entity, and ensures the risk-proportionate protection of its electronic information systems that affect aviation safety;

3. ensures the realisation of its safety and strategic goals by providing the necessary resources, an inspiring work environment, training its managers and employees, and by developing its processes and technical equipment, by setting specific targets and performance indicators in the areas covered by this policy and regularly assessing their achievement;

4. cooperates with national and international industry organisations and its partners in order to enhance its safety and quality performance and requires its partners to comply with the requirements of the management systems;

5. its Chief Executive Officer has general responsibility for safety, quality management, security and information security and ensures that the operation of the company's safety, quality, security and information security management systems are efficient, unbiased, and free of unauthorized interference, and that the requirements of the management systems are integrated into all processes of the organisation;

6. ensures that its executives take responsibility for providing a safe and quality service, are committed to achieving – or, if in line with company interests, exceeding – national and international industry goals, and to maintaining a high level of safety, security and information security and reporting culture;

7. ensures that its personnel carry out their activities consciously, in a fully responsible and professional manner with due regard to the effect of their activity on safety, the society, the environment and sustainable development, and are committed to maintaining a high level of safety, security, information security and reporting culture;

8. continually assesses its safety, quality, security and information security performance and does not accept any deviations that are detrimental to safety;

9. conducts concise, transparent, and broad, two-way communication – including with respect to this policy – with its employees and customers.
